OFFICIAL EFFICIENCY (?).

Balzac is credited with the saying that "no one stays in the Government offices, under a bureaucracy, but idlers, incapables, and fools." And BALZAC knew what he was talking about. Can this scathing criticism be fairly applied to the majority of the Government officers of Hongkong? Let us investigate. It will be admitted without discussion that the Government of this colony is a very powerfully-organised bureaucracy, with the Governor as a nominal head. Each department is independent, and ruled over by a chief whose powers are practically autocratic. Sir John Pore Hennessy temporarily checked this system and insisted on personally directing theworking and bearing theresponsibilities of the several public departments; but after his departure things were allowed to drift back into the old groove, and successive governors and administrators during the past ten years have been mermouthpieces of their subordinates. The results of the change have not been encouraging so far as 'the interests of the community are concerned, as is very clearly evidenced by the lengthy chapter of gross misgovernment, ridiculous legislation, and scandalous_extravagance in dealing with public moneys which is open to inspection in the archives of the Government and the columns of the daily newspapers. doubt it would be unjust to say that all the responsible officers of the Hongkong Government are idlers, incapables, or fools; but it is equally certain that a very large majority of them can fairly and honestly be classified under one of these three heads, and the truth of that assertion is all but universally recognised. To-morrow it is our intention to lay before the readers of the Telegraph the facts in connection with the disgraceful Opium Farm bungling, a fiasco that, owing to the ignorance or incapacity of certain 'honorable' officials who posed as inspired authorities on that important source of revenue, has cost the colony something in the neighbourhood of \$60,000 per annum at the very lowest estimate; and in the

local schools for the past year amounted to something like \$22,000, and on the 9th of February, Dr. E. J. EITEL, the Inspector of Schools, sent in detailed accounts and statements to the Audit Office. appears that the routine is for the Audit Office to forward the accounts to the Colonial Secretary's department, then they are laid before the Governor for signature, and afterwards returned to the Treasury for payment. In any properly conducted commercial establishment all of this would have been carried through in the course of a few hours, but the TITE BARNACLES of the Government offices are not business men, and their functions, if we may judge from their actions, and parrotlike chatter, are mostly of an ornamental character. At all events a week passed and there was no sign of the Patrician ... American ship , Singapore. Grant-in-aid accounts; the week became Alacrity British cruiser , a cruise. a fortnight, the fortnight a month and then the patience, of the persons to whom the money was due became exhausted, and complaints were made, which led to official inquiries. But Dr. EITAL's report and statement of accounts Jonan when he became an inside passenger biblical tradition. The Auditor had done his duty by promptly forwarding the documents to the Colonial Secretary lost, or pigeon-holed, or something else, 20 is a matter of uncertainty—but they disappeared and left no trace behind. It was then suggested that the Inspector of doubtless that, although a work of consider- marriage i able magnitude, was the only way out of the difficulty. But what about the gross and inexcusable carelessness displayed by responsible Government officials in a 75- scandalous neglect of duty? In any bank all. We are not yet through it. If this is

meantime we will briefly relate a series of

incidents in another matter of importance

If it is not worth twenty-five cents to kiss a girl to further th cause of religion, and aid in litting the mortgage on the church, it is not worth a cent, and Mr. Moody, when he attends a fair of that denomination, should patronize only the five cent grab-bag.

A TEMPERANCE orator was at a supper the other evening. Opposite to him sat a well-known divine of the Church of Scotland. HONGKONG correspondent of the Broad Arrow, evidently a military man, suggests that Britain should re-occupy Port Hamilton and annex Formosa. He says that Formosa is a natural coal station, which we may live to see in other hands. He further states that " Hongkong as a garrison is at present a satirical commentary upon itself," which is rather rough on the local tax-payers after the big contribution tothe defences of the island and the aunual military imposition of £40,000.

On Saturday last a Chinaman who was losfing about Garden Road aroused by his curious movements the suspicion of Detective, Hadden, who went for him and after a long chase caught him. The prisoner resisted violently, kicking. biting, and struggling desperately. A lady who saw the affair evidently thought that Mr. Hadden (who was in plain clothes) was some private individual simply enjoying himself; for she stood-by-waving her umbrella and shricking at him " cruel monster !" and " brutal ruffian ! and so on, winding up, as the detective at last marched off with his man, by yelling after him, "You scoundrel, you ought to be ashamed of yourself." THE Diarlo de Manila of February 27th says that the coast steamer N. S. del Carmen has brought back from Balabac the members of the Lighthouse Commission, who have been inspecting all the light-houses at work or in course of construction in the southern part of the Philippines. While visiting the neighbourhood of the Ursulas Islands (Balabac Straits) they saw the abandoned British barque Argvil, whose wreck was reported recently, the crew having already arrived here. The Spanish gunboats Mindanao and Calamianes, stationed in those waters, were standing by the wreck, to render any assistance required. The barque was bound from Iloilo to Montreal, with a full cargo of sugar which its now entirely destroyed; but

more whalebacks will pass around Cape Horn they will make a steamship's time and carry a sailer's cargo. The round trip of a sailing vessel between New York and San Francisco, including loading and unloading, consumes the better part of a year, nine months being quick work. Cargoes range in value from \$100,000 to \$250,000. The rate per ton is about \$750. The Charles W. Welmore has made the trip to Puget Sound in sixty days, with a cargo valued at \$250,000 on an expense account of less than \$1,800, the fielghts paying a passage (figuring at going rates) of \$20,000. The round trip including loading and unloading; could therefore be made in five to six months, or one-half the time of the sailer, and short stoppages made at intermediate ports, something the sailing vessel does not attempt.

A CIRCUS IN THE COURT.

Bala Singh, a watchman, sued S. Reich, manager of Woodycar's Circus, for \$12, wages due. The defence was that plaintiff had not earned the money, as through his gross negligence a coil of rope valued at \$60 had been stolen. Evidence having been given on both sides, his Lordship said that the proper way to meet plaintiff's action was to enter a cross action for damages through negligence. In the present action, judgment must be given for the plaintiff, with stay of execution for a week in order to allow the Circus proprietors to sue on their counterclaim.

THE CHARGE AGAINST THE OPIUM FARMER.

He then gave details of a large number of items in the receipts and disbursements of the farm, verifying the correctness of the amounts entered by himself in the books. At this point Mr. Francis observed that some one had carelessly left out several amounts in his copy of the accounts and he would therefore let these stand over until the next sitting.

His Worship agreed. After some further examination of the accounts Mr. Francis said—" I think we'd better stop." Some conversation now ensued as to a convenient day for the further hearing of the case, during which his Worship remarked that he would be leaving the colony about the 31st inst., so that if the case were to take six months he would not be able to conclude it. It was also mentioned that Mr. H. E. Wodehouse would sit on Monday next.

It was finally arranged that the case should stand adjourned until Wednesday at' 10 a.m., his Worship stating that he would devote the entire day to the hearing.

The ordinary annual meeting of this company was held this afternoon, Mr. D. Gilles presided. and there were also present Messrs, R. Shewan T. E. Davies, J. S. Moses (director:) W. Shewan, G. H. Potts, S. S. Benjamin, C. A.

The Chairman said:—Gentlemen, the report

and -accounts - having - been -in -your -hands - for some time, we will take them as read. There is very little for me to add to the report, as i contains in a few words the history of the Company since our last meeting. The net result of our year's working is not so favourable as it might have been, for owing to the heavy loss which we sustained by the failure of Messrsi Russell & Co., it has been necessary to write off from this year's earnings the sum o \$20,000, and a further sum of \$5,000, has been written off for depreciation; and we recommend the payment of our usual dividend of 12 per cent, which on the whole is a fair return, and your consulting committee trust that it will give general satisfaction. The price of rope ruled lower all round throughout the year, so that although we did a large turnover. the profit on the working is not quite up to that undergone many fluctuations, but by judicious purchasing and by shutting down the factory limit, we have been able to avoid the necessity of buying the raw material at too high a figure The machinery was thoroughly overhauled in the month of January, is now in good order and continues to turn out the best quality of rope procurable in the East. Therefore, having the benefits of a central situation and cheap labour we are placed in a better position than any of our competitors in the trade, being able to place on the market a superior rope at a lower rate. With these advantages, ... if the ... encouraging support we received in former years is continued to give effect to the change in name and style of I we have every reason to expect good returns in the Surveyor General and Surveyor General's | the future which will greatly assist us in making a steady reduction in our overdraft at the Bank. Before moving the adoption of the report and

statement of accounts I will have pleasure in answering any questions of the shareholders. There being no questions, it was proposed by the Chairman, seconded by Mr. Potts, and agreed that the report and accounts be adopted.

The re-election of the consulting committee (Messrs. Gillies, Moses, Davies, and R. Shewan) was proposed by Mr. Sawver, seconded by Mr. W. Shewan, and carried unanimously. The re-election of the auditors (Messrs, Arnole

and Henderson) was proposed by Mr. Benjamin seconded by Mr. Moses, and carried. This concluded the proceedings.

THE CHINA AND MANILA STEAM SHIP COMPANY, LIMITED.

THE TEMPERANCE RACKET

our parsons on the stump "Oh t boys, come along with me

And join the 'appy, 'appy band, For we'll conquer or will die, And Beelsebub defy, As we dence along in the 'appy band-all together,'

Last Sunday all the reverend gentlemen in Hongkong held forth in their temples on the subject of temperance. One of these followers of the lowly Nazarene was fortunate enough to have a long-cared short-hand reporter in his congregation who "took a note" and the result was a column and a half of undiluted twaddle in Monday's China Mail.

"Banish the bottle from your table. Stopasking friends to take what you vaguely describe as 'something' or a 'little drop' Avoid the bar-rooms, and sign no chits for intoxicating drinks !" pleaded the Rev. G. H. Bondfield in the Union Church. This gentleman is sensible. well-meaning and practical, and yet he cannot see anything for the reformation of tipplers but a wholesale boycott of the tap-room and the bottle. "Oh thou invisible spirit of wine ! if thou hast no other name to be known by, let us call theo devill" said a man named William Shakesposre. who wrote a few plays (now obsolete). But the immortal William was undoubtedly one of the best of good fellows who nightly sipped his: toddy, and constantly figured in the tap-rooms: of the period. Strange to say the weaters of the "white gown" all concurred with Shakespeare: in his opinion of the spirit of wine, but they went further and voted the spirit of all alcoholic heverages a positive curse to humanity. Crime. lunacy, vice, all were traced to the deadly hottle. The tens of thousands spent annually on drink, the neutrality of many, the opposition of the few who are called, and the utter indifference of the vast majority of men of the world, all came under the lash of the champions of the total abstinence cause.

One preacher, with a peculiarly elastic imagianation, held that spiritual regeneration alone could effect a revolution in what he termed this republic of alcoholism." That is what ho said, but whether he meant to say it or know what he said is quite another matter for which the reverend gentlemen can alone be held responsible by his flock.

Another clerk in holy orders trusted to the "Band of Hope" propaganda, on the basis-"Tis education forms the common mind; just as the twig is bent the tree's inclined."-The "common mind" in the case of Hongkong being bribed with buns and coffee and the commoners' souls illuminated by magic lanterns. the strains of a common every-day harmonium, and choice. "words in season"-veritable balm of Glicad 1

A third aspirant for honours in the temperance cause, in a moment of enthusiasm fairly bordering on insanity, screeched thusly :- "O thate men should put an enemy in their months to steal away their brains." [And this worth w went on to assert (as though he knew by experience and personal knowledge) that nine times out of ten the enemy obtains his entrance through the social glass. Thus much and more, on divers texts and pretexts, the ecclesiastic drum was banged yet, throughout the lengthy discourses there was heard no clue as to the annihilation of the drink-fiend. None of the godly lecturers had any notion as to when the enemy would have to beat a retreat, or whether he would be driven from his strongholds at all. So it ever was, and so it ever will be, Now let us come down to business and treat

the subject from a practical point of view. How, many, may we ask, of the temperance apostle s put their alleged principles into practice? They'll go around, tell a man he's going right down to the bottom of the bottom less pit, and I he devil and all his angels will stoke un the the brimstone furnaces for ever and ever and there'll be great tribulation, and weeping and wailing and grashing of teeth; and it ien the "drunk" puts his hand into his pool :et. pulls out his last Mexican and hands it to the temperance orator and with trembling hand and a huge tear trickling down his pallid cheek (o nly one) signs a card, leaves the meeting-10 om and goes towards his cheerless home, but ere he has reached the thereshold of his domicile the of this being flooded. This shaft is now sunk transactions appearing in the farm books. All Managers in place of Mesers. Russell & Co., light in you public house has caught his eye, the sound of his comrades' voices fall on his ear. He halts, and muttering to himself consigns tectotalism to a very sultry but still unexplored region, enters the gin palace, and in a few minutes is in the thick of the fon and holding up to ridicule the "goodygoodies" who scared him out of his wits and-a dollar ! It is the extreme measures of social purity cranks of the Alfred S. Dyer,' Avy Varley, and Moody and Sankey type that bring the advocates of the cause into thoroughly merited ridicula and contempt. But, however this may be. the sparkling wine has its pleasures and its merits as well as its admitted evil influences. It makes "some prople a gry, others sleepy, others festive, others excited, but nearly every one goes in for it, more or less- they all slother cup, and it will need a greater power than the no doubt well-intensioned prosing of temperance advocates to convert the masses to tectotalism. Some abatement in what is termed the "drink nulsance" (overdoing the thing, in other words). is doubtless a consummation of the temp, rance crusade devoutly to be wished for, but to seek its total extinction is an undertaking as preposterous and sidiculous as it is absolutely impossible, and that is a fact which must be patent to all but a class of sgitstors who are blind for the simple reason that "none are so blind as those that

MARINE LITIGATION.

It now appears that the lawyers are, after all, to amass a few fortune's out of poor foolish shipowners who are at present wrangling among themselves. The unlucky Torvington is the subject of three actions. On Wednesday she was districted? on behalf of the New Oriental Bank, for advances of about \$3,000, it is believed, which were made In Saigon or Tourane, during the very troubled voyage of the steamer from Salgon to Hongkong. On Thursday morning she was again arrested (though she had not escaped) on the suit of the Dock Company, for some \$8,000 claimed for repairs. On Thursday afternoon a third arrest was made, the crew claiming over £200 for wages. The balliffs are in possession of the vessel, which now lies near the Quarantine anchorage, plastered all over with Supremo Court notices.

The Rormsida has also been arrested in the matter of the Indo-China Company's claim for salvage. The "man in possession" has taken, up quarters on board, and will remain until some further step has been taken. The case has not yet been set down for hearing.

FOOCHOW NOTES.

Foochow, 5th March, 1802.

It is rumoured that a new Viceroy has been appointed and that he may be expected here some time in May. The present Min Magistrate is, we are

informed, about to vacate, his post, and a new one has been appointed in his place. The creaking of frogs and the buzzing of selssor-grinders have been heard for the first time this week. Spring has come upon us

somewhat suddenly. A daring robbery took place in the city last Sunday night at a j-weller's shop. The burglars, twenty in number, walked off with gold, silver and pearls to the value of \$6,000. It is suspected that the cook of the shop was an accomplice, as he disappeared at the time and has not since been heard of. The gang is supposed to be in hiding in the locality of the late fire, but as yet the authorities have not been successful in finding them.

A further advance of to cents per plcul has taken place in the price of rice, making the rise within a month 50 cents per picul, and as there are so many labourers out of work at this time of the year the dearness is severely felt. As no arrivals are expected from the North, still higher prices are anticipated. We know the export has been prohibited from Shanghai, and we are beginning to think a similar prohibition may be in force at Ningpo. The authorities are no doubt night. watching this.

The heavy rain of last Tuesday night and part of Wednesday seems to have caused some alarm amongst the villagers in the low-lying districts, as we hear of preparations having been made for expected fleods. The freshet in the river proved the correctness of the report of an unusually heavy fall of rain up country. The new moon of Sunday last came in with anything but fine weather, and the natives predicted s wet fortnight in consequence. Happily they have not proved themselves altogether good weather prophets.

We hear that Hell, the likin Toatal, is to be transferred to Amoy vice the present incumbent of the office there, dismissed on account of his being so often at loggerheads with foreigners. We wish Hou the same successful career he has had here. It may not be generally known that it was through his foresight and prudence that the apprehended troubles at the Arsenal in September last were averted. It was he who moved that the garrison should be dispersed without delay, and fortunately the Viceroy adopted his motion and acted on it. He was. as to the probable danger likely to arise at Pagoda by Chang-kwo-chen, the Criminal Judge, long connected with this port.

We made mention last month of the inconvenience caused by the short supply of ten cent pieces. The local government we hear, are quite put about by the non-arrival of a large supply of these coins expected as long as twelve months ago. Either under estimating the needful requirements, or replying upon the immediate arrival of the fresh supply ordered, they prohibited the issuing of too cash notes, a prohibition they find it very difficult to enforce in the absence of sufficient silver coins, as it would seem imperative for the daily, needs of the people to have the sum in one form or the other, and it they cannot get the one they use | the city. the other in face of the law. The current value of the government coin is the same as it is in Hongkong, viz: 106 cash; while the similar coins of Japan are only worth 98 cash each.-

THIS WILL SETTLE THE QUESTION!

"I don't believe there is a word of truth in it."

That's the way certain foolish people talk when they hear of anything unusual, or outside the limits of their own observation of experience. They are of the sort who laughed at Stephenson when he introduced the railway, and at Morse when he said that we could communicate by means of electricity. Xet they don't

Herd is her number! She repeats what she at first said, and puts a quietus on all who called her words in question. It will be observed that her statement is as plain and solomn as language can make it.

I, Mary Oudrly, of 28, Catherine Street, Richmond

Road, Leeds, do solomnly and sincerely declare as Ever since I was a girl I have suffered from illness. I always had a pain both before and after sating, and by the Emperor Francis Joseph, who in his speech announced that Bills would be introduced to establish a gold standard for the Empire. Sometimes food prospects are that they may be among the seemed to ease it, and at other times it made me feel worse, and often I went without food, for I was afraid to est. Commonly when food was placed before me I could not touch it, and I often fainted at the very sight of it. After a while I became so weak I could searcely stand or walk. Lithought it was consumption The Indian Councils Bill has passed through whom some lost their husbands before they were coming on by degrees and I took all sorts of medicines to try, and get relief, but it was of no use, and I got tired of taking physic, for I had lost all faith in it. My business was so urgent that I was compelled to be at work, otherwise I would have laid in bed, so weak had I become. With the weakness and loss of appetite there were other feelings and signs that were bad and alarmed me greatly. Among them were these :—A yellowish colour of the skins and eyes, sometimes a cold clammy perspiration, pains and sches in the sides, the chest and back, headache, a kind of wind or gas coming up into my throat and mouth that was so sour and sickening I could scarcely bear it. The pain was so severe that I have saked my husband if he could not hear my heart thumping as I walked about. I always slept badly at night, and frequently had horrible dreams, and was so melancholy and depressed in apirits that I would sit down and cry, for I got no pleasure as time dragged wearily by. I had so little energy or strength that it was all I could do to summon courage for the labour upon which the family (at least in part) depended for support. I am a dressmaker, and it will be easily understood how hard my life was, for I didn't think it would last much longer. Not long ago (May, 1887) made up my mind to try a medicine that i advertised and known all over the country. I mean Mother Soigol's Curative Syrup. I had no faith in it at first, for how can one believe in what one knows nothing about? I bought and tried Mother Seigel's Curative Syrup only because of its reputation. How could so many people, I asked myself, praise a medicine better and gave me strongth, and by persevering with it all my pains disappeared. I could eat my food with a relish, and everything agreed with me. Now religious services at the rooms of the Young and again when, through confinement and hard-work,
